

ALISHBA HAROON

AI & MACHINE LEARNING ENGINEER

Lahore, Pakistan | alishbaharoon988@gmail.com | [linkedin.com/in/Alishba-Haroon](https://www.linkedin.com/in/Alishba-Haroon) | github.com/Alishba-Haroon | Portfolio: alishbaharoon.dev

PROFESSIONAL SUMMARY

Final-year Artificial Intelligence undergraduate with hands-on experience building and deploying machine learning, deep learning, and NLP systems in Python. Delivered measurable improvements in model accuracy and training efficiency during a Machine Learning internship, and currently building Retrieval-Augmented Generation (RAG) pipelines as a Backend AI Engineering intern. Shipped three independent applied ML projects spanning text classification, NLP transcription, and Generative AI-powered decision systems. Strong foundation in data preprocessing, feature engineering, model development and evaluation, API integration, and cloud deployment. Seeking an entry-level AI/ML Engineer, Machine Learning Engineer, or Data Scientist role.

TECHNICAL SKILLS

Programming Languages: Python, SQL, HTML, CSS, Nest.js, Next.js

Machine Learning & AI: Data Preprocessing, Feature Engineering, Model Development & Evaluation, Natural Language Processing (NLP), Deep Learning, Generative AI, Retrieval-Augmented Generation (RAG), Large Language Models (LLMs), API Integration

Libraries & Frameworks: NumPy, Pandas, Scikit-learn, TensorFlow, PyTorch, Hugging Face Transformers, OpenAI API, Google Gemini API, Whisper, Flask, FastAPI

Tools & Platforms: Jupyter Notebook, Google Colab, Git/GitHub, VS Code, React, TypeScript

Cloud & Deployment: Google Cloud Platform (GCP), Docker, Version Control, Workflow Automation, Model Deployment

Data Analytics: Power BI, Data Visualization, Business Insights & Storytelling

WORK EXPERIENCE

AI Intern — FlyRank AI

Jul 2026 – Present

Remote

- Designed and developed Retrieval-Augmented Generation (RAG) pipelines using Python, FastAPI, and LLMs for AI-powered applications.
- Integrated Google Gemini API and implemented prompt engineering techniques to improve response quality and accuracy.

Machine Learning Intern — Elevvo Pathways

May 2025 – Aug 2025

Remote

- Optimized machine learning models, improving prediction accuracy by 20% through iterative hyperparameter tuning and validation.
- Reduced model training time by 30% by applying feature selection techniques.
- Built a customer-facing chatbot that increased user engagement by 35%.

Software Engineering Job Simulation — JPMorgan Chase (Forage)

Jan 2026 – Feb 2026

Remote

- Completed real-world software engineering tasks covering system design, debugging, and financial data analysis.

PROJECTS

Tie Breaker AI: Decision Support System

Jun 2026 – Jul 2026

- Built an AI-powered decision-making web application using React, TypeScript, and Google Gemini API, generating AI-driven reasoning and objective recommendations for comparing multiple options.

Resume Analyzer

Jan 2026 – Feb 2026

- Built a text classification model using Naive Bayes and Logistic Regression algorithms, achieving 95% precision on spam detection.

Auto Subtitle Generator

Sep 2025 – Oct 2025

- Developed an NLP-powered subtitle generator using Whisper and Hugging Face models, supporting multilingual transcription and translation with 90%+ accuracy.

EDUCATION

B.S. in Artificial Intelligence — Superior University <i>Grade: A</i>	Oct 2023 – May 2027
Intermediate in Computer Science — Superior Group of Colleges <i>Grade: B</i>	Oct 2021 – Mar 2023
Matriculation in Biology — Allied School <i>Grade: A+</i>	Apr 2019 – Feb 2021

PROFESSIONAL DEVELOPMENT

• Google AI — Google	Jun 2026 – Jul 2026
• Google AI Essentials — Google	May 2026 – Jun 2026
• SQL — Sololearn	Jan 2026 – Feb 2026
• McKinsey Forward Learning Program — McKinsey	Jun 2025 – Jul 2025
• Aspire Leaders Program — Harvard	Jan 2025 – May 2025
• 5-Day Generative AI Intensive — Google & Kaggle	Dec 2024 – Jan 2025

LANGUAGES

English (Fluent) | Urdu (Native) | German (Basic)
